

Aluminium

Aluminium, Glass Windows, Doors, Cladding Products And Services

ALUMINIUM

Gulf Turrets LLC was established in the year 1998 as Turnkey Telecom and civil contracting company that deals with all kinds of Construction, Telecom, & maintenance projects in UAE.

In order to cater the huge demands of the construction industry in UAE and as part of diversification the company has expanded its operations into the field of construction. A new division is set up exclusively for taking up the entire aluminium related works such as building facade claddings, curtain wall glazings, doors, windows, sky lights, glass partitions and railings.

Gulf Turrets LLC takes its own pride in being able to offer products of superior quality and performance at best competitive price & prompt delivery. The company has maintained good infrastructure with a warehouse facility for the industry to meet the demands of new projects and maintenance services. The company also has a team of dedicated & professional staffs that helps to provide fast & effective service to our valued customers. We are dedicated to provide the best quality products and services based on deep rooted commitment to merit our customer's business and goodwill.

SPECIALITIES

FABRICATION

Our aluminium fabrications range from display and lighting applications through to products for the marine and architectural markets.

QUALITY ASSURANCE

Our quality management system is based on continuous improvement. Our aim is to supply quality products and surpass the requirements of customers, to establish strong relationships with both customers and suppliers, that will contribute to improving the quality of what is sold and purchased.

INSTALLATION

Installation can be carried out on fixed price, or supply men on daywork basis. Our experienced Site Managers visit all sites frequently to ensure appropriate level of service. If required they will act as the full time representative for the execution of works in the required time frame.

SAFETY

Safety at our production plant is also one of our dutiful obligations and thoughtful concerns. Ensuring constant health, safety and welfare at work for all of our employees, is imperative for us.

ALUMINIUM COMPOSITE CLADDING & CURTAIN WALLING SYSTEMS

We offer a wide range of premium quality, highly durable Aluminium Composite Panel (ACP) Cladding which is largely used in the construction industry. These products are customized in shape, design, texture, thickness, fittings and size to suit the specifications of our customers. These are made up of finest quality aluminum and are used to divert the action of air, water and solar radiation. Also, these products are available at cost effective price.

We provide a wide range of proprietary stick/customized curtain walls, which are designed to incorporate opening windows & doors to suite client requirements. Standard curtain wall systems generally suitable for the majority of new build & refurbishment projects, and can be used in low-rise & high-rise applications.

With the introduction of this new range of panels and innovative technology, we will have a panel to suit your every need. Whether it is curtain walls, columns, eaves, spandrels, balustrades, interior walls or where ever a lightweight and fire resistant panel is required.

Curtain walling is either constructed on site, or can be fabricated in the factory in unitised panels. Whilst the cost of unitised fabrication is generally higher, the benefits include manufacture in a controlled environment, and faster site erection. Unitised construction is better suited to larger scale projects. Curtain walling is supplied with a polyester powder paint finish, available in a standard range of matt & gloss colours, or metallic.

We have in store for our clients, a highly functional range of structural glazing & curtain walls that are used in high rise building to ensure stability. Our glazing is suitable for building construction applications owing to their features of durability and accurate thickness. Available in various shape and sizes, these structural glazing and curtain walls can be customized to suit the varied requirements of our clients.

ALUMINIUM COMPOSITE CLADDING & CURTAIN WALLING SYSTEMS

Complementing of high quality aluminium and hybrid windows, doors and curtain walling products, Gulf Turrents LLC contributes to the total fabrication solution of high quality, high specification insulated glass units.

Product List :

1. Insulated vision glass units
2. Structural bonded insulated vision glass units
3. Non vision panels
4. Structural bonded non vision panels.

ROOF GLAZING SYSTEMS

Roof glazing and roof lantern is an excellent way to bring additional natural light into your room. The right roof glazing can make a huge improvement on property and quality of life. Its long term value compliments the enhancement of your property.

Roof glazing is designed for use in contemporary architecture with wide self-supporting spans and large glazing bar centre sizes. It is available in a wide range of polyester powder coat RAL colours and can be seamlessly integrated with Roof glazing curtain walling system.

Roof glazing can accept windows, doors, smoke vents and roof windows.

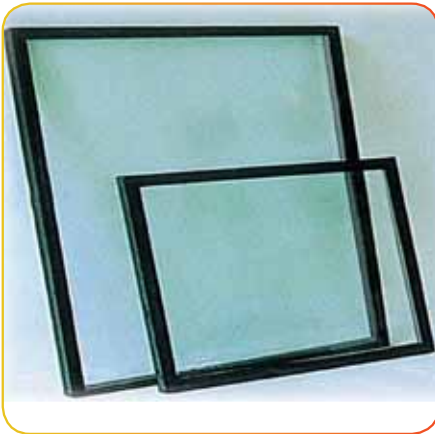

GLASS

TOUGHENED GLASS

Toughened Glass is also available on requirement. Its strength is better in comparison of normal glass. This is safe, strong & has no difference in look from other normal glass. It will shatter into small fragments, rather than sharp shards, when broken. It shows enhanced thermal resistance, and breaks into small cuboid that's why it makes less injury then normal glass.

INSULATED GLASS

We also offer the insulated glass to make your place low noise. This glass made with two glass in which the dehydrated gas or any other gas filled between both glass. It's called double glazing also. This glass reduces the heat transfer so it maintains the temperature of place.
